What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. The amount you will receive will vary depending on the market performance of the underlying investments and the length of time you stay in the plan. The estimates of the maximum and minimum amount that could be returned to your beneficiaries for the selected time periods (1, 10, 20 years) in the death scenario shown in the table above have been calculated assuming you invest once-off €10,000. For the purposes of calculating the death scenario and accumulated insurance premiums, the age of the insured is assumed to be 50 years at the time of entry to the plan and the duration of the insurance policy is assumed to be 20 years (recommended holding period). To calculate the value of the investment, we assumed that the performance of the product is the same as in the moderate scenario.

June 2025

Investment Premium*	€10.000 €0	If terminated after 1 year	If terminated after 10 years	If terminated after 20 years
Death Scenario		From - To	From - To	From - To
